Subject: Do Your Job

What a shameful performance.

The Department of Justice nominally exists to bring about justice for the citizens of the United States. You have failed the citizens and the nation in the Microsoft case by failing to bring about justice in any way shape or form. Did you notice the lower courts found that Microsoft acted monopolistically? Please discharge your responsibility to address this violation and redress wronged parties.

Your actions are so far from just, its as if you are trying to equal the Supreme Court's partisan role in the election. Making the world safe for 'General Motors' is not the standard. Your role is to help make the world safe for fair competition in software and Microsoft must be brought to justice.

Corporations are not citizens. That corporations are indemnified from legal redress for wrong doing that individual citizens are punished for is on its face improper.

A government high-jacked by savage capitalists is no government.

Sincerely,

Frank Agnello
